Assessment Scale

The self assessment tool defines various stages of increased capacity for each dimensions in scope. Each dimension contains a unique description of multiple capabilities relevant to that dimension. The assessment tool is used as a framework to identify:

Current State – level which describes the current state assessment for each component.

Target State – level which describes the target future state vision for each component based on a 3-5 year timeframe.

Components of World Leading Institutes: Education

Education

•Organization does not offer any opportunities for combining secondary or post-secondary education with athlete preparation and training.
 •Organization does not possess any relationships with post secondary or online/distance education institutions.

•Organization is partnered with a middle and secondary school institution contributing to the standard education and credit requirements required for diploma completions. Programming is flexible in accommodating the training, travel, and competition demands for high performance stream athletes.
 •Organization has established relationships with reputable post-secondary and graduate institutions providing access to counselling assisting students in career and education options.
 •Organization has established relationships with distance education providers that facilitate access to high quality online learning opportunities.

•Organization provides required middle and secondary school academic programming on site, contributing to the standard education, credit requirements necessary for diploma completions and the qualifications necessary to pursue post-secondary education. Programming offers flexibility in accommodating the training, travel, and competition demands for high-performance athletes.
 •Organization has established relationships with reputable post-secondary and graduate institutions offering deliverables directly benefiting resident high performance athletes e.g., early registration, tuition vouchers and career/academic counselling.
 •Organization offers mentoring programs assisting students in exploring career and education options.
 •Multiple learning options are available including full time, part time and on line learning options
 •Athletes have access to tutor support, access to internet while travelling and portable devices
 •Organization has established relationships with distance education providers that facilitate access to high quality online learning opportunities.

•Organization provides on site, required academic programming, grades 6-12, contributing to the standard education, credit requirements required for diploma completions and the qualifications necessary to pursue post-secondary education. Programming offers flexibility in accommodating the training, travel, and competition demands for high-performance athletes.
 •Organization has established relationships with reputable post-secondary and graduate institutions offering deliverables directly benefiting resident high performance athletes e.g., early registration, tuition vouchers and career/academic counselling.
 •Organization offers mentoring programs assisting students in exploring career and education options. Institutions provide access to established professionals who provide valuable advice in regards to personal and professional development.
 •Organization has established relationships with distance education providers that facilitate access to high quality online learning opportunities.
 •Knowledge transfer and personal/professional development are paramount to the development of people.

Performance Training Centers

2.0 A NEVER ENDING JOURNEY

- ❑ opportunities for each Institute/country to be competitive, to be stronger, to be better
- ❑ presentations only " opens the door"
- ❑ need to go deep/intense

Challenges:

- intentionally select 5 people that are at least a generation younger than you, that you can mentor, direct and guide.
- who are you developing? What young leaders are you mentoring?
- regeneration is a leader's duty. Need to stay current in your field or skills will rust.
- an infusion of leadership; when leaders stop learning, leaders should stop leading

- stronger tie with others in the international sport community; strengthen our communication and cooperation.
- the longer an organization is around, the more it may turn inward and there is a greater possibility to lose the passion for the mission.

- complexity of leadership changes in the past few decades.
- create a place for others to lead.
- in the people business, investments in people not just programs.
- personal growth cannot be templated.

-
- Successful Institutes are and will continue to be built on people. It is not a “build it and they will come”. Need to devote energies to attracting, developing and retaining the right performance staff
 - Appreciate, affirm, equip, recognize, challenge your people – celebrate
 - Focus

Leaders

- Opportunity to reflect on your strategies and hone your skills to make better choices, develop innovative solutions and forge stronger collaborations
- Skilled leaders are a powerful investment
- Cultivate leadership over time; support is tailored to specific priorities and needs

a never ending journey.....

HPTC – values, attitudes, behaviors connected to culture of Life Long Learning

- Need to adjust/change; or go backwards...and eventually extinct (out of business)
- Not let status quo interfere with progress
- “the only easy day was yesterday”

a never ending journey.....

- ❖ Next big breakthrough in performance sport?
- ❖ Medical – injury prevention/illness
- ❖ Recovery/regeneration

a never ending journey.....

- ❖ Quality assurance
- ❖ Talent retention
- ❖ Change in delivery?

Thanks
